## **PROFESSIONAL SUMMARY**

Technical Fashion Design student and Industrial Production Specialist with a proven track record of delivering high-stakes print and textile solutions for Fortune 500 companies and Global Luxury Houses. Expert operator of industrial-scale hardware including HP Latex 3100, Durst P5, and EFI M3h systems. Mastery of the full sublimation lifecycle (Paper-to-Fabric) via the 5-Meter Monte Heat Press. Combines elite-tier technical manufacturing experience with artisan garment construction and Gerber AccuMark proficiency.

## **EDUCATION**

Wayne State University | Detroit, MI

Bachelor of Fine Arts in Fashion Design | Expected Graduation: 2027

- Key Focus: Fashion Merchandising Strategy, Advanced Garment Construction, Textile Science

## **TECHNICAL SKILLS**

- Industrial Digital Production: HP Latex 3100, Durst P5 Dye-sublimation, EFI M3h UV Hybrid Flatbed, 5-Meter Monte Heat Transfer Press (Textiles & Rigid Substrates).
- Manufacturing & Materials: Technical Textile Sublimation, Rigid Substrate Printing, Color Calibration/Profiling, Material Tension Management, Industrial Quality Assurance.
- Design & Construction: Gerber AccuMark (Pattern/Marker Making), Industrial Sewing, Draping, Tech Pack Development, Pattern Drafting.
- Software: Adobe Creative Suite (Illustrator, Photoshop), Microsoft Excel (Inventory/Logistics).

## **PROFESSIONAL EXPERIENCE**

Tectonics | Production Associate | Auburn Hills, MI | 2023 – Present

- Elite Client Account Production: Lead operator for high-visibility production runs for industry titans, including Louis Vuitton, Apple, Google, Victoria's Secret, Amazon, NBA2K, and John Deere.
- Luxury & High-Tech Standards: Executed color-critical projects for Louis Vuitton and Apple, maintaining 100% adherence to rigorous global brand guidelines and "zero-defect" quality standards.

- Textile Sublimation Leadership: Directed the end-to-end sublimation workflow for Victoria's Secret and other apparel-focused accounts, utilizing the Durst P5 and 5-Meter Monte Heat Press for high-volume textile output.
- Large-Scale Digital Manufacturing: Managed roll-to-roll and flatbed production on the HP Latex 3100 and EFI M3h, bridging the gap between digital design files and physical industrial scale for Amazon and Google commercial applications.
- Digital Integration: Utilized Gerber AccuMark to optimize fabric yield and technical layout, ensuring maximum efficiency for large-scale, high-value manufacturing runs.

### **ADDITIONAL EXPERIENCE**

Bash Original Izakaya | Service Professional | Detroit, MI | 2026 – Present

- Maintain operational efficiency and team coordination in a high-pressure, fast-paced environment.

Blimpie | Operations Support | Detroit, MI | 2025 – Present

- Handle inventory management and production standards in a high-volume retail setting.
